Evergreens are coming to be used much more extensively the last few years, not only because we are learning how to grow them and how to handle them, but because we are learning how to use them. With the many new varieties, we have a wide range in form and sizes, enabling one experienced to select one suitable for almost any location: the stiff globe and pyramid shapes for the formal garden; the graceful, dignified, and picturesque form for the natural planting; and the dwarf forms to be used for foreground work instead of shrubs.

In caring for them, we have learned that, to produce the best results, it is necessary to transplant often, give them plenty of room, and cultivate thoroughly, making vigorous, shapely trees with plenty of fibrous roots.

Therefore, these prices are for vigorous, well-rooted trees, dug with a ball of earth, except in the smallest sizes where it is unnecessary.

Perennials have increased greatly in popularity attempting to keep up with the demand, we have added new varieties to our list as fast as we have found them adaptable to Wisconsin conditions. We have grown increasingly large quantities until we now grow many thousands each year.

The plants quoted are all strong, field grown, transplanted stock of sufficient age and strength to bloom the first year.

Perennials in No. 1 plants will be furnished in assortment at 35 cents each, \$3.00 per ten and \$25.00 per hundred

These prices include delivery and our usual guarantee. Special prices will be made on large quantities, without delivery or guarantee.
